Professional Summary

Full-stack developer skilled in the MERN stack and REST APIs, experienced in role-based platforms, Stripe integrations, and building scalable, user-centric solutions

Experience

Nessfi Tech Pvt. Ltd.   **August 2024 - Present**
Full-Stack Developer   Mohali

- Responsible for building scalable backend REST APIs using Node.js, Express, and MongoDB.
- Contributed to the development of role-based healthcare features, subscription flows, and real-time data operations using Next.js and React.
- Integrated Bubble.io workflows with custom Node.js webhook APIs to automate lead processing.
- Developed dynamic, personalised Webflow pages using script-injection–based rendering.
- Managed deployment and production maintenance on AWS EC2 using PM2, Git, and GitHub CI.

Projects

DAHN   **August 2024 – Present**
Documentation App for Hospice Nurses
🔗 https://dahn.ai/

Developed a secure, role-based healthcare platform for agencies and nurses with subscription and patient management capabilities.

- Developed patient notes with draft, update and archive flows.
- Implemented Stripe recurring subscriptions with automated off-session renewals.
- Added RBAC for Admins, Agencies, and Nurses.
- Integrated video uploads and invoice generation
- Deployed on AWS EC2 using PM2 with Git/GitHub-based CI.

Neuropage   **October 2025 - Present**
AI-Powered Lead Page Automation
🔗 https://go.neuropage.io/page/Abhishek-Mehta-Neuropage

Built an automated workflow to generate personalized Webflow landing pages for each lead.

- Integrated Bubble workflows with custom Node.js webhook APIs to send lead data for processing.
- Processed and transformed lead data in Node.js for dynamic page generation.
- Used script injection on Webflow to render personalized content.
- Automated creation of unique lead URLs and returned them to Bubble.
- Added request validation and structured logging for reliable execution.
